paragon

history our story

2003 became the dawn of a new and long awaited era for the SWP market. Paragon 1, launched in August of that year followed by Paragon 2 in 2005, have become the most cost effective pay to play video entertainment terminals. A trait unique to Paragon is the fact that GamePack Smart, the industry leading multi-games compendium with the highest earning games content, is available to the entire Paragon family, thus offering commercial common sense to Independent Operators.

introducing paragon3

Paragon 3 heralds yet another new era, being the first games terminal to utilise widescreen technology now prevalent throughout the audio visual market. Using a 23" widescreen monitor, Paragon 3 delivers incredible graphics offering players enhanced and compelling game play.

Games Warehouse endeavour to be the foremost customer focused and product driven business. With customer feedback taken into consideration, and as a direct result of our attentiveness, Paragon 3 encompasses the numerous technical improvements required to meet the ever stringent demands of machine operating. Increased ventilation, improved coin routing, upgraded security are just some of the areas which make Paragon 3 the most sought after video entertainment terminal of its time.

Paragon 3 will host the now industry benchmark GamePack Smart, which has a proven and ongoing development strategy, delivering New Games Updates free of charge to all Paragon customers with a valid games licence. Continuance of this, incorporating ever improving quality games, ensures that as well as being the most sought after, Paragon 3 is set to become the highest earning content provider in its class.

technical specification

summary

Games Warehouse is still the largest independently run manufacturer and supplier of video entertainment terminals. Paragons' unique game content provides Independent Operators an exclusive product range to compete cost effectively in an increasingly competitive market.
