INFINITI

INFINITI

leading the way

Games Warehouse is the UK's leading supplier of multi-game SWP terminals. The launch of Paragon in 2003 gave independent operators a genuine opportunity to compete with their national counterparts. Four short years later, there are now more than 8,000 Paragons sited and earning strong and consistent income for our partners.

Gaming machine players worldwide now expect high quality game content from a terminal with more than a single game offering. Our new Infiniti Digital Gaming Platform surpasses their very best expectations and promises to be the future of pay-to-play gaming terminals in single site, arcade, LBO and casino locations in the UK and beyond.

□□□□□

ahead of its time

The stunning Infiniti Digital Gaming Platform has proved to be a revelation. Aesthetically, it follows the Paragon tradition of being an instant eye-catcher. And it has the personality to match its looks. Dual 19" high resolution touchscreen monitors offer a player interface of previously unknown quality, whilst traditionalists will welcome the button panel providing a built-in player alternative.

Connectivity is the most sought after development in our sector. Each Infiniti has a optional factory-fitted GPRS modem and broadband capability. Automated dial-up delivers data to our back office, enabling operators to study cash-in figures, payout percentages and gameplay statistics via a secure website portal.

The longevity of Infiniti is ensured thanks to our proven SMART software engine. An ever-changing portfolio of gaming content, including favourites such as Roulette, card games and high-tech AWP style games, will continue to deliver a content mix to please all players.

INFINITI ownership experience

We provide an unprecedented 12-month warranty, regular game updates, unique content licensing and tailored financial plans that absolutely ensure that Infiniti is highly desirable and comfortably affordable.
